# Provincial Context – Community Based Health Care

---

- The vision for Community-Based Health Care in Alberta is to plan and structure health care around people and their community.
- Alberta Health's goal is to have a health care system that keeps people healthy, while also supporting those who need care.
- Primary health care is the hub of this partnership connecting community assets and stakeholder relationships.

# Primary Health Care – How are we doing this?

---

## **Governance**

- setting provincial direction
- establishing clear roles and responsibilities

## **Legislation//Policy/standards**

- developing health policy and standards
- monitoring implementation plans and
- establishing targets for success

## **Funding**

- Developing sustainable, accountable funding models that encourage evidence-informed practice and provide best value for Albertans

## **Accountability**

- establishing clear performance expectations and accountability mechanisms

# Tools/levers for implementation
