

Alberta Screening and Prevention Plus (ASaP+)

Purpose: To assist primary care clinics in adopting a suite of evidence based screening maneuvers that allows providers to communicate and address the risks associated with modifiable factors. Discussing modifiable factors with patients may increase opportunities for brief intervention and supporting patients in positive health changes

Aim Statement: By X date X clinic will increase the offers of support for patients with modifiable risk factors by X %

Outcome Measure: % of patients with documented screen, receiving brief intervention within a specified interval

Balancing Measure: Ensuring ASaP screening rates do not decline while implementing ASaP+

Key Documents: [Full Change Package](#), [Evidence for PBPs](#), [Sequence to Achieve Change Workbook](#)

High Impact Changes	Potentially Better Practices (PBPs)	Process Measures	Tools
1. Improve the patient experience	1.1 Create opportunities that allow for routine, non-judgmental conversation of modifiable factors	Patient Survey completed in clinic	ASaP+ Training Guide Patient Survey Tool
	1.2 Integrate modifiable factors management into collaborative care planning	# of care plans completed with a positive modifiable factor	Care Planning Template
	1.3 Develop a personalized approach that supports patient understanding about modifiable factors	Patient survey completed in clinic	ASaP+ Training Guide Patient Survey Tool
2. Optimizing the EMR for modifiable factors	2.1 Use EMR data to identify and support: <ul style="list-style-type: none"> Point of care reminders and EMR workflows are used to enable proactive approach to modifiable risk factors Panel based measurement and monitoring of modifiable factors 	# of patients screened for each modifiable factor # of patients eligible for care planning (positive modifiable factors)	EMR Tip Sheets ASaP+ Measurement Guide ASaP+ measures form
3. Standardize documentation	3.1 Establish standardized documentation of modifiable factors in the EMR	EMR Audits	EMR Tip Sheets EMR Data Entry Assessment Tool

ASaP+ CHANGE PACKAGE SUMMARY

High Impact Changes	Potentially Better Practices (PBPs)	Process Measures	Tools
4. Coordination of the team in the medical home	4.1 Test and implement a process that bundles opportunistic screening of modifiable factors	Documentation of screening processes	ASaP+ Training Guide
	4.2 Develop action plans with patients to support care planning	# of care plans completed with a positive modifiable factor	Care Plan Template Health Care Methodology tools
	4.3 Establish clear roles and responsibilities and a shared mental model for your medical home team	Documented roles and responsibilities of the team members	ASaP+ Training Guide ASaP+ Rationale, level and grade of evidence
5. Coordination of care in the medical neighborhood	5.1 Develop relationships with PCN, community and zonal resources that support patients to make positive health changes related to ASaP+ modifiable factors	Improvement team generated community and PCN resources list completed	ASaP+ Program and Resource Quick Referral List
