**Albertans have a**  
Community Encounter  
Digest (CED) in their  
Alberta Netcare record

“ The challenge was ensuring we set dedicated time to complete the paper work. There is a lot of paper and a lot of details. Once you get through the paper, the value to patients is immediate. Within days of being live, we saw Community Encounter Digest reports and knew we were impacting our patients

informational continuity. ”

*Kneehill medical Clinic, Three Hills, AB*

Patients  
submitted to a  
CPAR panel

“ Having information in one central repository is essential to continuity of care outcomes on a broader scale. It is heart breaking when problems are caused by lack of adequate information sharing. I'm delighted to see CII addressing the gap. ”

*Dr. Steve Tilley*  
Cardiologist, Healthy Heart Institute,  
Red Deer, AB

LIVE CLINICS

“ Of course, we could not wait to jump onto the proverbial bandwagon when CII/CPAR was introduced. Not only is it an enabler of continuity of care for us, it helps us receive notifications when our paneled patients attend the ER. ”

*Dr. Olubukola Maxwell,*  
Grande Prairie, AB

### HQCA ON-BOARDED SURVEY DATA

*From Aug 2019 report*

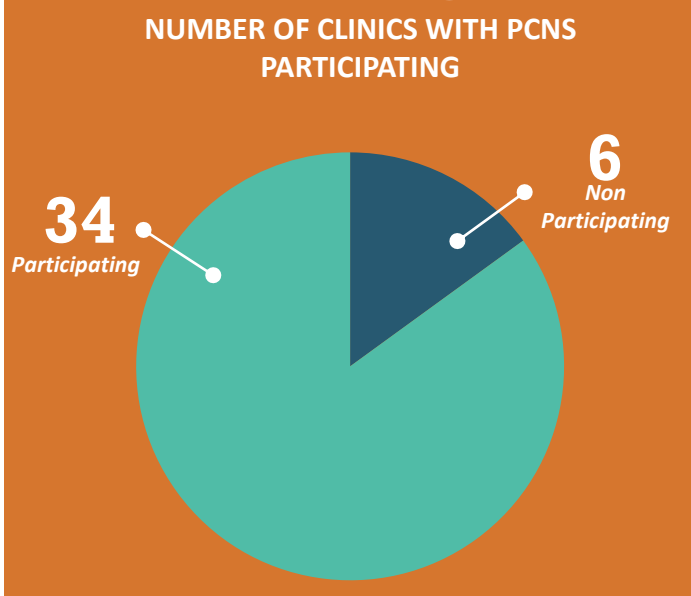

- 93%** Are comfortable sharing information with other health care providers
- 93%** Are comfortable sharing information with Alberta Health for the purposes of planning and QI
- 93%** Agree or strongly agreed that the sharing of information through CII/CPAR will lead to better patient care

**86%**

*"I am glad we made the decision to participate in CII/CPAR"*

**72%**

*"I am glad we made the decision to participate in CII/CPAR"*

**“** One recent patient..., was in the ER with a bit of emotional distress, but it was just useful to see she actually regularly sees her family doctor, this is something that’s been diagnosed before, so this is not a concerning or a new thing that I have to reinvent the wheel. **”**
