

# Benefits of a Patient's Medical Home

Recent studies - as numbered below - have found that with the implementation of a Patient's Medical Home, practices have experienced several improved outcomes. Many of these changes occurred even in the early implementation stages, and were sustained and increased over time. *For the outcomes of Cost Savings, Quality, Utilization and Preventive Care, the greater the extent of PMH implementation, the better the results.* Refer to the attached reference list for the article.

## A Literature Summary of 73 Peer Reviewed Articles

Several studies specifically found fewer ER visits & hospitalizations in patients with chronic disease. 12, 26, 34, 40, 44, 46, 49, 59

### UTILIZATION

38/44

studies showed positive results

1, 2, 3, 4, 7, 9, 10, 12, 14, 15, 16, 17, 19, 21, 22, 26, 27, 28, 30, 32, 34, 35, 41, 42, 46, 48, 51, 52, 57, 60, 66, 68, 69, 71

### ACCESS

6/6

studies showed positive results

6, 19, 50, 22, 30, 52

### PREVENTIVE CARE

11/13

studies showed positive results

5, 15, 16, 18, 22, 30, 31, 39, 52, 65, 71

### COST SAVINGS

18/21

studies showed positive results

3, 6, 7, 9, 10, 12, 13, 14, 30, 32, 33, 34, 46, 52, 56, 59, 66

### QUALITY

9/9

studies showed positive results

1, 3, 10, 22, 31, 42, 43, 47, 62

### SATISFACTION

13/15

studies showed positive results

1, 3, 16, 19, 22, 23, 24, 25, 30, 34, 52, 53, 72,

Several studies have found that Patient's Medical Home implementation improves both patient and provider satisfaction.
