

SCREENING & PREVENTION

(formerly ASaP)

Purpose: To assist primary care clinics in adopting a suite of evidence-based screening maneuvers for their patient panels

Aim Statement: By X date X clinic team will have improved screening rates by X%

Outcome Measure: # of patients with documented screening offers, for eligible screening maneuvers, within recommended interval

Balancing Measure: Patient cycle time

High Impact Changes	Potentially Better Practices	Process Measures	Tools
Identify paneled patients for care improvements	Generate patient lists for screening	# of patients due for each ASaP Screening Maneuver	Screening Maneuvers Menu for Adults EMR Supports STEP Documents
Improve the patient experience	Bundle offers of screening to minimize screening burden on patient	Patient experience survey completed in clinic	
	Offer patient screening care and record patient response		

High Impact Changes	Potentially Better Practices	Process Measures	Tools
Optimize screening processes	Test and implement a process for opportunistic screening that bundles offers of screening	Documentation of screening processes	Process Mapping Guide
	Test and implement a process for outreach screening that bundles offers of screening		Process Mapping Guide
Standardize Documentation	Record offers (as available/applicable) and completion of screening in a standard location and method in the EMR	EMR audits	EMR Supports
Coordinate care in the medical home	Establish clear roles and responsibilities and a shared mental model for your medical home team	Documented roles and responsibilities of team members
